## How to add a SVG chart to the RNZ website

001 -

To use the high quality svg images provided by *figurenz* website editors need to use the new chart functionality on the RNZ website. This document provides step-by-step instructions on how to add a new chart.

1. Charts can be accessed via the **Charts** menu item under the **News** section of the RNZ website admin screen.

Categories	Received and the second s	Locations		
Emergency	The second se			

2. Upload a new chart by selecting the **Add new chart** button, then entering required information on the screen that follows. Note that the high quality charts need to be in svg format, ie the filename should end in .svg, not .jpeg, .png or .gif.

Add a new Ch	
Title *	A sample chart
Caption	The caption for this chart
	Update caption if required
Alt	Alt text that describes the content for users that cannot see the image
Copyright	RNZ
Chart	Choose file annual_wet_days.svg

3. Once saved use the provided Elfmark to include the chart in iNews or on the RNZ website.
